

Satellite Radio offers a service just as cable TV does. We pay for this service, just as you would cable. Their programming is not offensive (even if it there is a channel that is offensive to some, there are a hundred more to choose from). It is part of our free speech to be allowed to listen to what we want to. We use this service quite frequently when traveling and wouldn't know what to do now without it. Please don't take it away from us.
